WHAT'S NEW?

THE LATEST UPDATES FOR THE CANADIAN LIVESTOCK TRACKING SYSTEM (CLTS)

December 27, 2017

Event Submission Module:

Two new indicator selection options have been added to allow users to select indicators from either inventory.

New event- Disposed

Only accounts with Producer, Dead stock operator, Pathology lab, or Veterinary hospital and lab operation types will have access to submit this event.

Users will have the option to report deceased animals with or without an approved indicator.

WHAT'S NEW?

THE LATEST UPDATES FOR THE CANADIAN LIVESTOCK TRACKING SYSTEM (CLTS)

December 27, 2017

Event Submission Module (continued):

Date picker pop-up is available for all date fields to prevent data entry errors.

The screenshot shows a form titled "Tags Associated with the Event". The "Event Date" field is highlighted with a date picker pop-up for December 2017. The date picker shows a calendar grid with the 13th of December selected. Other fields in the form include "Event Type" (Move In), "Source Account", "Source Premises", "Vehicle ID", "Destination Account", "Destination Premises", "Sex", "Species", "Breed", "Colour", and "Comment".

Remove Tags from List button will remain greyed out until indicators are added to the list.

The screenshot shows the "Submit Events: Animal/Tag Selection" form. It includes instructions on how to add or remove tags. Below the instructions are several radio button options: "Tag", "Tag Range", "Tag Range with Quantity", "Spreadsheet File(CSV, XLS, XLSX)", "Select from Unused Tag Inventory", and "Select from Animal Inventory". The "Add Tags to List" and "Remove Tags from List" buttons at the bottom right are circled in red.

Once indicators are added, a pop-up explaining the use for the button will appear when the mouse/cursor hovers above it.

This screenshot is similar to the previous one but includes a tooltip that appears over the "Remove Tags from List" button. The tooltip text reads: "By clicking this button, the tag(s) entered will be removed from the list shown below. Removing these tags will not affect your CLTS database inventory. If you are reporting deceased animals, please submit a Retired event." Below the form, there is a section titled "List of Tags Associated with the Event" which contains a table with columns for Action, Entry Type, Details, File Name, and Count.

Action	Entry Type	Details	File Name	Count
Add	Tag	00 0124000299999999 (CCIA)		1
