

Tag/Indicator and Animal Inventory

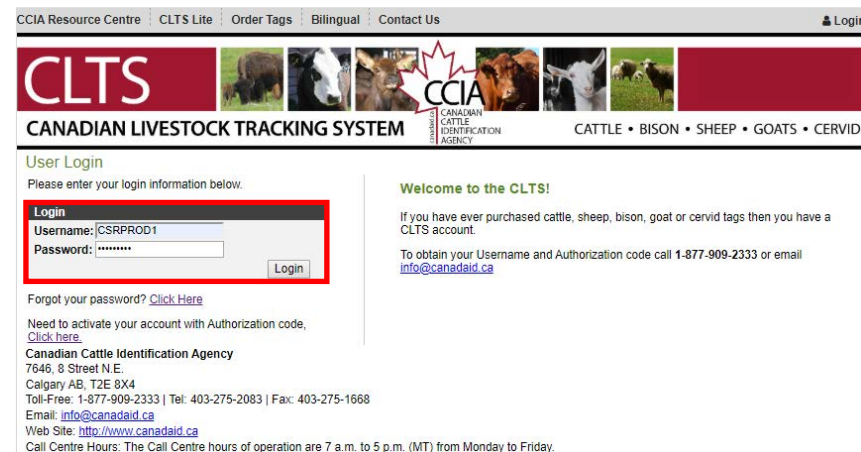

This document provides instructions on how to search, view, and download tag/indicator and animal inventory. Click on the page below to be taken to the instructions for each inventory type.

Tag/Indicator Inventory includes all of the tags/indicators you have purchased. If tags/indicators you have purchased do not appear in your inventory 24 hours after you have purchased them, please contact the dealer you purchased them from and have them issued to your account as soon as possible. You are unable to apply any events to your tags/indicators in the CLTS database until the tags/indicators appear in your inventory.

Animal Inventory includes any tag/indicator that you have applied an animal event to. Once you apply the animal event such as a birthdate or cross-reference event, the tag/indicator is removed from your tag/indicator inventory and will appear in your animal inventory. Purchased animals will also appear if a Move In event was submitted.
