

CLTS MOBO ENHANCEMENTS

WHAT'S NEW?

THE LATEST UPDATES FOR THE CLTS MOBO APPLICATION

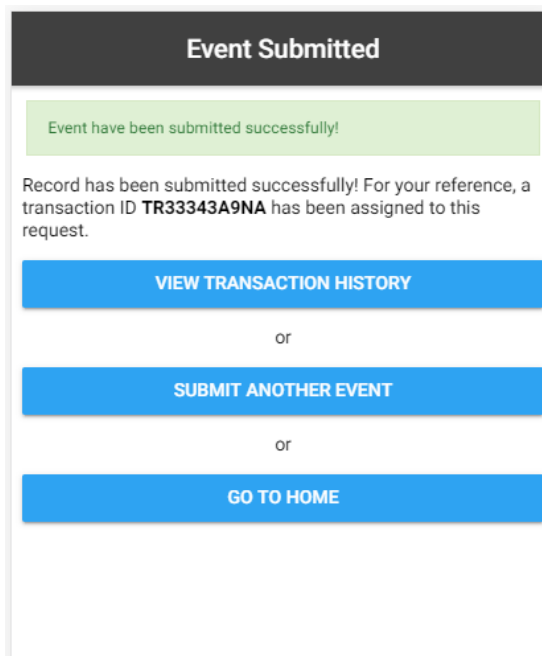

As of November 13, 2020

Enhancements have been made to the CLTS database

- Many of the enhancements are standard updates which will improve the software internally but will not impact the user experience with the software.
- Some enhancements have to do with the overall design and efficiency of the app and will benefit the user.

1. 'Go to Home' option in Event Submitted Success Page

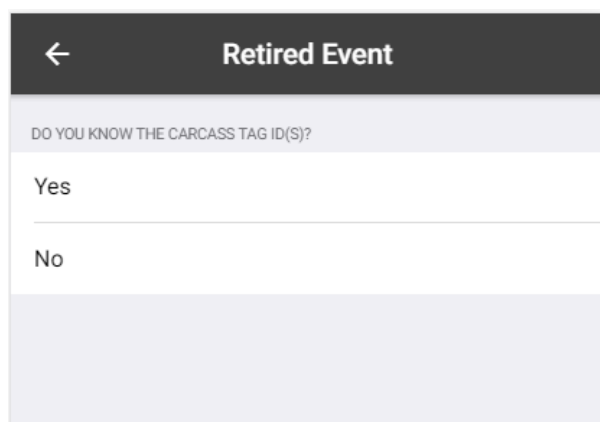

This function adds a 'Go to home' button that will allow users to easily navigate back to the home page after successfully submitting an event. Adding this third option also lends more intuitiveness to the user experience of this application.

2. Addition of Retired event without Tag ID

Currently, the CLTS supports submission of retired event without a tag ID. This change will reflect the CLTS changes on the CLTS MOBO.

1. This new feature will prompt the user if they know the carcass tag ids or not.

WHAT'S NEW?

THE LATEST UPDATES FOR THE CLTS MOBO APPLICATION

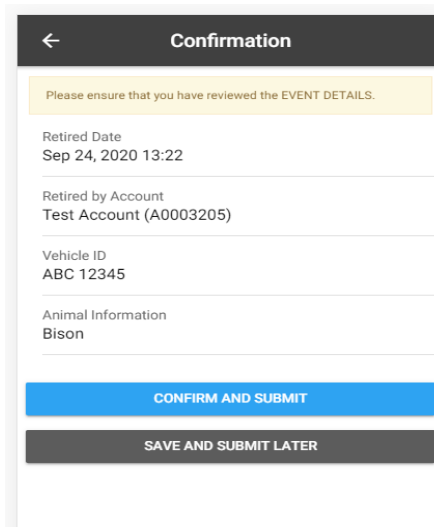

- If the user selects "Yes", they will be redirected to the add tags page.

- If the user selects "No", they will be directed to a page that asks for additional information in place of the tag id.

- After filling out the required and optional details and clicking next, the user will be redirected to the confirmation page listing the details submitted.

THE LATEST UPDATES FOR THE CLTS MOBO APPLICATION

3. Display Text messages for all input field for Retired Event without Tag

Currently in Retired Without Tag ID event, some fields have no placeholder text in the input form including Source Account and Source Premises.

Source Account and Source Premises now have a placeholder text

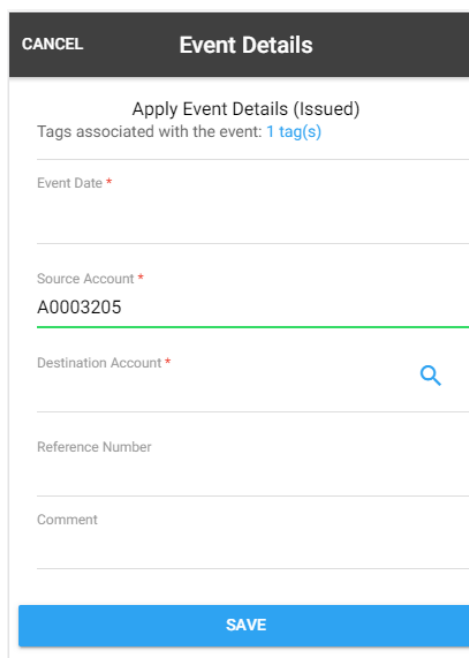

The screenshot shows a mobile application form titled "Retired Event". The form contains several input fields with updated placeholder text:

- Retired Date ***: (empty field)
- Retired by Account**: Test Account (A0003205)
- Source Account**: CLTS Account ID from which the carcass was removed
- Source Premises**: Premises ID from which the carcass was removed
- Origin Of Animal**: The name and address of the owner or person in possession
- Vehicle ID**: Licence plate of the vehicle
- Animal Information**: Details about the animal such as sex, species, breed, colour
- Carcass Number**: Maximum 40 characters
- Quantity**: Quantity must be less than 10,000
- Comment**: (empty field)

4. Reference Number field addition in Issued Event

Currently, the CLTS supports Reference Number inputs in the Issued event. This change will reflect the CLTS changes on the CLTS MOBO.

The screenshot shows a mobile application form titled "Event Details" with a "CANCEL" button on the left. The form is for an "Issued" event and includes the following fields:

- Apply Event Details (Issued)**: Tags associated with the event: 1 tag(s)
- Event Date ***: (empty field)
- Source Account ***: A0003205
- Destination Account ***: (empty field with a search icon)
- Reference Number**: (empty field)
- Comment**: (empty field)
- SAVE**: (blue button)

WHAT'S NEW?

THE LATEST UPDATES FOR THE CLTS MOBO APPLICATION

- In Record Details, Dairy Records are now shown with a cow head icon, and On-Hold records are now shown with a yellow warning icon.

 <p>The screenshot shows a list of five records in the 'Record Details' view. Each record includes a Tag ID, Event Type (Birthdate), Event Date (20201021), and an error message: 'Error: N1620 - This is a dairy animal event and will be transferred to DairyTrace'. Each record has a cow head icon to its right.</p>	 <p>The screenshot shows a single record in the 'Record Details' view. The record includes a Tag ID, Event Type (Birthdate), Event Date (20150111), and an error message: 'Error: N1619 - Tag is not issued. A new On-Hold transaction(ID-TR33343AEQJ) has been created. Waiting for Issued Event.' The record has a yellow warning icon to its right.</p>
