

CLTS ENHANCEMENTS

WHAT'S NEW?

THE LATEST UPDATES FOR THE CLTS DATABASE

As of April 2020

Enhancements have been made to the CLTS database

- Many of the enhancements are standard updates which will improve the software internally but will not impact the user experience with the software.
- The following two examples are the only changes that will alter the design of the CLTS database.

Enhancement #1: Two events can now be searched without a Tag ID: Retired/Disposed Event and Group Movement.

Previously, when searching for a group movement or disposed/retired event without a tag ID, using Request History Search, the event submitted does not appear in the results. This will confuse people as some events will appear in the search, where others will not.

Change 1: Add note at the top of the **Request History Search Criteria** page to remind users of the other two search links available.

Request History Search Criteria

To search Disposed/Retired without tag ID , use the [Search - Disposed/Retired Event](#) 
To search Group Movement without tag ID , use the [Search - Group Movement History](#).

Retired	2019-11-01 00:00	Abattoir CCIA Test(A0011428)						TR333434QKV

Showing 1 to 1 of 1 entries Previous 1 Next

Change 2: If user doesn't click on any of the links and enters the transaction ID in Request History Search

Criteria, a note will be displayed informing user that the transaction ID is for without tag ID. Results appear on a separate page.

Request History Search Criteria

i The transaction you are searching is Disposed/Retired without tag ID, click [here](#) to view search result.

To search Disposed/Retired without tag ID , use the [Search - Disposed/Retired Event](#)
 To search Group Movement without tag ID , use the [Search - Group Movement History](#)

CLTS ENHANCEMENTS

Enhancement #2: Add Web Service to submit and search Disposed/Retired event, without Tag ID

We have increased our backend capability when dealing with webservice. The Following web services will be added in CLTS:

- *Submit Disposed/Retired Event without tag ID*
- *Search Disposed/Retired Event without tag ID*

Large producers and feedlots with herd management software, or those using a third party to upload their information using a herd management software, will no longer need to login to the CLTS or require a Tag ID to search for the above events.
